# INTRODUCTION

## EXPLANATION OF THE CURRICULUM OUTLINE

The **SCORE Curriculum Outline for Vascular Surgery (VSCORE®)** is a list of vascular and core surgery patient care topics to be covered in a vascular surgery training program. The curriculum includes vascular surgical diseases/conditions and operations/procedures and core surgical medical knowledge topics essential to the care of the vascular patient, as well as the Accreditation Council for Graduate Medical Education (ACGME) required topics on professionalism, interpersonal and communication skills, practice-based learning and improvement, and systems-based practice. It is designed to be relevant to five-year integrated training programs, as well as two-year fellowship programs.

The outline has been created with input from the Vascular Surgery Board of the American Board of Surgery, the Association of Program Directors in Vascular Surgery, the Society for Vascular Surgery and the Review Committee for Surgery (ACGME).

The Vascular Surgical Council on Resident Education (VSCORE) is a nonprofit consortium with the mission of improving the education of residents in vascular surgery. VSCORE Member Organizations include the American Board of Surgery-Vascular Surgery Board, the Association of Program Directors in Vascular Surgery, the Society for Vascular Surgery, and the Review Committee for Surgery (ACGME).
